DETAILED ACTION

Allowable Subject Matter

Claims 1, 2 and 4-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent **Claims 1 and 10**, prior art fails to teach a "switch element coupled between the emission element and the drive element, and wherein said switch element switches flowing or not through said emission element said current based on a control signal according to said distance to control said light emission time period in one frame period". Prior art merely teaches that a switch is located between the drive element and the emission element but the switching is not control by a distance as claimed.

Regarding dependent **Claims 2, 4-9 and 11-19**, they are dependent either directly or indirectly from one of independent Claims 1 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
